

## security audit

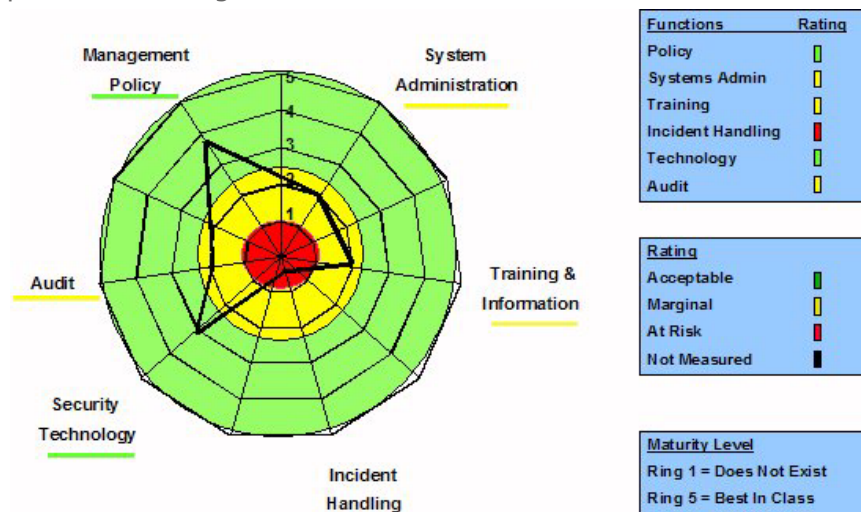

Technology Consulting Associates, LLC (TCA) was engaged by the CIO of a large marketing firm to develop a security audit template for worldwide implementation.

### vision

Initial meetings were held with all relevant personnel to audit existing security measures. This audit provided the basis for modification of TCA's Security Audit Template, which addressed these areas:

- Security Management
- Security Administration
- Security Training
- Security Technology
- Incident Handling
- Security Audits

Based on the template, TCA performed an audit of the client's headquarters. From the information provided, a visual summary was prepared for management review.

### results

TCA delivered the following:

- Complete security audit of the client's headquarters
- Detailed security audit template for all offices around the world

### value

Management embraced the project's findings and initiated implementation of the audit recommendations.
